PREFACE.

We now present the second number of the Cambridge Directory to the public. In so doing we feel well assured that it is as accurate and complete as any other work of the kind now published.

No efforts have been wanting on our part, to procure the name and residence of every inhabitant, as well as statistics in relation to our city and its Institutions; and we think that as much has been done as could possibly be done under the circumstances. The preparation of a publication of this sort, involves vastly more care and labor than people in general are aware of; and this labor is much greater in a place like Cambridge, than in one more densely populated. The city embraces a large extent of territory, the houses are much scattered, and more than all—are not numbered. But we have thoroughly canvassed each of the Wards, and by so doing have found many names that were unknown to us last year.

In this number we have added the names of over *fifteen hundred* persons, more than were in our first number, besides between three and four hundred alterations; so that we have good reason to feel confident, that we approach perfection as nearly as it can be attained in a work of this nature.

Should we meet with the success to which we feel that our efforts entitle us, we shall duly issue succeeding numbers, with such improvements and additions as the growing interests of our city require, trusting ultimately to make it a source of profit, as heretofore it has proved but a tax upon our finances.

An Addenda will be found on page 16, containing the additions and corrections which were made after the body of the work was printed.

Entered according to an act of Congress, in the year 1849, by

JOHN FORD,

In the Clerk's Office of the District Court of the District of Mass.

Eclipses in 1849.

This year there will be four Eclipses: two of the Sun and two of the Moon.

An annular Eclipse of the Sun, *Thursday, February 22d*, invisible throughout the United States

A partial Eclipse of the Moon, *Thursday, March 8th*, visible throughout the United States. At Cambridge, beginning of Eclipse, *6h. 39.9m.*; end of Eclipse, *9h. 39.9m.*

A total Eclipse of the Sun, *Friday, August 17th*, and *Saturday, August 18th*, invisible throughout the United States.

Our City

Is divided into three Wards, so bounded as to conform to the usual and long familiar designations of the three principal settlements. The boundaries are at present pretty well defined by nature, but how long this will be the case at the present rapid rate of improvement and settlement, is a question which a few years will answer. In every section of the city, the marks of progress meet the eye in all directions;—the little wood-land still left is disappearing, the marshes are fast becoming dry land, and the ancient landmarks are giving way to streets and rows of handsome dwellings. A word or two upon the several Wards must suffice for this year.

Ward One, known as Old Cambridge, embraces the original settlement, and extends westerly and northerly to the towns of Watertown, West Cambridge and Somerville. On the south, Charles River divides it from Brighton, and a ridge of higher land separates it from Ward Two. In this Ward are most of the objects of interest to a stranger. The buildings and pleasant grounds of the University, the Craigie place—now owned by Professor Longfellow—formerly the head quarters of Washington, the old Elm, under the shade of which, on a fine July morning in 1776, Washington received the salute of the officers of the American army as their Commander-in-Chief,—the entrance to Mount Auburn Cemetery—that pleasant resort for the tired citizen, Fresh Pond, the noble Observatory with its magnificent telescope, the Botanical garden, (Ichabod, alas !) and the Massachusetts State Arsenal. Within a year or two past, great improvements have been made here. At the head of "Professors' Row" a new building for the Lawrence Scientific School has arisen:—upon the hill, near the Observatory, a new Catholic Church raises its lofty cross; while in the fields and pastures where a few years since the student rambled and collected botanical specimens, streets and dwellings meet the eye on every side. In the business section of Ward One, the new store of A. H. Ramsay, and the extensive prin ting house and bindery of Messrs. Little & Brown, are worthy of notice. A charter has been obtained for a Branch Railroad, connecting with the Fitchburg, the Station of which, if it is ever constructed, will probably be an ornamental structure, not far from the new Scientific School.

Ward Two, known as Cambridgeport, occupies an extensive plain, bounded on the south and east by Charles River, on the north by the marshes which separate it from Ward Three, and by Somerville, and on the west by the ridge of higher land before mentioned, a part of which is known as Dana Hill. This section of the city is the principal place of business, though the opening of the Quincy Market in Boston, and the construction of the numerous railroads running from Boston, all of which by some fatality seem to avoid Cambridge, have almost annihilated the extensive trade which was formerly carried on between "the Port" and the country towns,

even as far back as the borders of Vermont and New Hampshire. In this Ward are the City Hall, the Almshouse, the offices of the City Clerk, Treasurer, Marshal, &c. Among the improvements may be mentioned, the extensive additions to the large establishment of Davenport & Bridges, for the manufacture of railroad cars, and engines,—the elegant structure for the use of the High School, —the beautiful dwellings of Mr. Valentine, on Prospect, of Dr. Williams, on Fayette, and of Mr. Learned, on Main street, &c. We hope, next year, to chronicle the opening of the Railroad, now in contemplation, connecting the Worcester with the Fitchburg, and other roads, and the completion of the new Athenæum building, which has unfortunately been of necessity deferred to another season. Probably few towns in Massachusetts have exhibited a greater change, in five years, than the northerly part of "the Port."

Ward Three, known as Lechmere Point and East Cambridge, is a bluff separated from Boston and Charlestown by the waters of the river, and from Ward Two by extensive marshes and narrow creeks. This Ward contains one of the Court Houses and Jails of Middlesex County, a House of Correction, and various County Offices. The march of improvement is as visible in this as in the other Wards; and the beauty of "the Point" has been much improved within a year or two past, by the large and splendid edifice for the Putnam School, by the remodelling and enlargement of the Court House, by the erection of various buildings connected with the Lowell Railroad, and by various new blocks of stores and dwelling houses. In manufactures, this Ward decidedly surpasses the others; and, among the principal establishments, may be mentioned, the extensive works of the New England Glass Company, the Bay State Glass Works, the soap and candle factory of the Winchesters, the large brush factory of Stratton, Sheriff & Co., and the granite works of Sanborn & Kemp. During the coming season, it is hoped that a new avenue of direct communication between "the Port" and "the Point" will be opened.

The Court House. — During the past year the Court House at East Cambridge has been entirely remodelled, and two spacious wings have been erected, in which are two of the best Court rooms in this State, if not in the United States. The outlay has been considerable—rising of *seventy thousand dollars*—yet we think no one who has had an opportunity to examine the building, and see the very great improvements in every respect, which have been made, will regret the expenditure.

The rooms occupied by the Register of Deeds, and the Probate Office, are fire proof, and have been very much enlarged and improved. There are a number of excellent rooms, accommodating the County Commissioners, Treasurer, Library, Clerk of the County, Juries, witnesses, &c., &c. The building is provided with the most approved ventilating arrangements, is well lighted and thoroughly warmed. Besides the main entrances to the building, which

are spacious and convenient, there are private entrances and a separate flight of stairs for the special use of those connected with the Courts.

The outside of the building is to be covered with composition similar to the "Revere House" in Boston. When completed it will add much to the beauty of that part of our city. The Architect, A. B. Young, Esq., of Boston, in connection with the County Commissioners, deserves much credit for the perfect arrangement of the building, and the faithful manner in which the work is executed.

HIGH SCHOOL.

Elbridge Smith, A. M.,.....*Master.*
Thomas Chase, A. B.,.....*Classical Teacher.*
Miss N. W. Manning,.....*Assistant.*
Miss Abbie Dalton,..... "

This is an English and Classical School, and is taught in the High

School House on Amory street, in Ward Two. It is open to pupils from all parts of the City, who are able to pass a satisfactory examination. The regular time for admission is at the commencement of the Fall Term, in September.

The Hopkins Classical School, on Dana Hill, is taught by E. B. Whitman, A. M. Free instruction is given in this school to nine pupils belonging to this City, and intending to enter College, as beneficiaries of the Hopkins Charity;—seven pupils to be selected and recommended by the School Committee. The chairman of the School Committee is *ex officio* a member of the Visiting Committee of this school.

The Schools in Ward One are under the immediate direction of Messrs. Albro and Livermore; those in Ward Two, of Messrs. Parker, Stearns and Wellington; those in Ward Three, of Dr. Clarke. The High School is under the direction of a Special Committee, consisting of His Honor, the Mayor, and Messrs. Stearns, Albro and Wellington.

Music is taught in all the public schools, by Mr. C. Plagge.

"University at Cambridge."

By this title HARVARD COLLEGE is mentioned in the Constitution of the Commonwealth, as also in the Statute of June 25th 1789, passed to carry into effect the second section of the fifth chapter of the Constitution. The legal style of the Corporation is, "The President and Fellows of Harvard College. The name "Harvard College" is given to the Institution by the Charter of 1650, which still remains unaltered and in full force.

The "University" consists of five departments—the College; the Law, the Divinity, the Medical and the Scientific Schools. The whole number of Officers of Instruction and Government, in all the departments of the University, is forty-six.

The Academical year is divided into two terms, of twenty weeks each, and two vacations, of six weeks each. In the revised code of Statutes and Laws, enacted by the Corporation and Overseers, during the past Academic year, it is provided that Commencement shall henceforward be on the third Wednesday of July, instead of the fourth Wednesday of August; the Summer vacation of six weeks to follow Commencement.

The Library of the University is divided into four departments—Theological, Medical, Law and Public. The Law Library is in Dane Law College, and embraces about 12,000 volumes, among which are the most valuable works extant on Law and Civil Jurisprudence.

The Public Library is in Gore Hall, and is designed for the common use of the whole University. It contains about 55,000 volumes, and is rapidly increasing. The whole number of volumes connected with the different departments, is as follows:

Theological Library,	about	3,000
Medical "	"	1,200
Law "	"	13,000
Public "	"	54,500
Society Libraries of the Students,	"	10,000
Total, about		81,700

The "Lawrence Scientific School" is designed to embrace a thorough course of instruction in Mineralogy, Zoology and Geology, Botany, Chemistry and Experimental Philosophy, as well as an extended course in Physics and Mathematics. The new Chemical Labratory and the building for the department of Engineering are in progress of erection. The formation of a Museum of Natural History, on an extensive scale, has been commenced, under the superintendence of the professors in the several departments. The Mineralogical Cabinet, Philosophical Apparatus, Anatomical Museum, the Observatory and Public Library of the University will be accessible to students of this department.

The number of Instructors in the different departments of the University are as follows:

The Faculty of Theology consists of the President and two Professors.

Of Law, the President and two Professors.

Of Medicine, the President and seven Professors.

Of the Scientific School, the President and nine Professors.

Of the College, the President, seven Professors, and four Tutors.

The whole number of Students connected with the University the present Academic year is as follows:

Theological Students,	19
Law Students,	96
Medical Students,	139
Students in Scientific School,	16
Resident Graduates,	6
Whole number,	276

The number of Undergraduates is as follows:

Seniors,	75	
Juniors,	58	
Sophomores,	68	
Freshmen,	72	
		273
Whole number,	273	
Total,		549

The necessary expenses of an undergraduate for a year, included in the College bills, are as follows:

Instruction, Library, Lecture-rooms,	$75 00
Rent and Care of Room,	15 00
Board for 40 weeks at $2 50 per week,	100 00
Or, Board for 40 weeks at $2 00 per week,	$80 00
Text books (average)	12 00
Special Repairs, &c.	from $1 to 2 00
	$184 or $204 00

Other expenses must vary with the economy of each student.—Wood and coal are delivered at the students' rooms, by the lessee of the College wharf, at the market price, usually at $6 50 per cord for wood, and $7 per ton for coal.

Some gentleman of Cambridge, not of the Faculty, is appointed by the Corporation to be Patron of all students, not of the Commonwealth, who belong to places more than one hundred miles distant from the University; and has charge of the funds of all such students.

THE burial place of the founder of Harvard College has long ceased to be marked, by any thing which designated the spot in the church-yard, where reposed the mortal remains of one whose name and memory are truly imperishable. Even the slab which, with the primitive simplicity of New England habits, tells the name and age of the deceased, was gone; and tradition, only, pointed out the place consecrated to his ashes. His best monument has always been the growing institution to which he gave such an efficient impulse. However unnecessary to his renown,

therefore, it was not creditable to those who had enjoyed the benefit of his munificence, that no act of theirs should show their gratitude and their respect; and it was to remove this blemish upon their own fame that the alumni determined, in 1837, that an obelisk of granite should be erected, not to preserve his memory, but to show their own sense of obligation, to point to his example with honor, and to indicate to coming ages the veneration in which his character was held by one of the many generations he had blessed.

The first suggestion of this project came from him, who was destined, a few years later, to hold the first place in the government, as he had long held a distinguished rank among the alumni of the College; and the plan met with that ready adoption, in the community, which indicates its adaptation to the feeling of the times, and was followed by the prompt execution characteristic of New

England activity. In just a year from the date of the dinner party where the monument to Harvard was first talked of, a subscription of one dollar from each person had been collected, which amounted to enough for the purpose; and a monument, of a chaste and suitable design, had been prepared. It was completed, and set in its place, with appropriate ceremonies, on the 26th September, 1828, when the Hon. Edward Everett delivered an address marked by those just thoughts, and that eloquent language, which have so often characterized his speeches, and delighted his audiences. The

following sentences extracted from it describe the monument, and repeat the inscriptions:

"It is constructed of our native granite, in a solid shaft of fifteen feet elevation, and in the simplest style of ancient art. On the eastern face of the shaft, and looking towards the land of his birth and education, we have directed his name to be inscribed upon the solid granite; and we propose to attach to it, in a marble tablet, this short inscription, in his mother tongue:

"On the twenty-sixth day of September, A. D. 1828, this stone was erected by the Graduates of the University at Cambridge, in honor of its Founder, who died at Charlestown, on the twenty-sixth day of September, A. D. 1638. [He died on the 14th Sept. O. S.]

LACON'S TEN RULES TO BE OBSERVED IN PRACTICAL LIFE.—1. Never put off till to-morrow what you can do to-day.

2. Never trouble others for what you can do yourself; this will promote your independence.

3. Never spend your money before you get it; this will save you from many difficulties and some temptations.

4. Never buy what you do not want, because it is cheap; many have been ruined by this.

5. Pride costs more than hunger, thirst, or cold. Banish it from your heart.

POPULAR RECREATION.—Can any thing be more lamentable to contemplate than a dull, grim, and vicious population, whose only amusement is sensuality? Yet what can we expect, if we provide no means of recreation; if we never share our own pleasure with our own poorer brethren: and if the public buildings which invite them in their brief hours of leisure are chiefly gin palaces? As for our cathedrals and great churches, we mostly have them well lock-

ed up, for fear any one should steal in and say a prayer, or contemplate a noble work of art without paying for it; and we shut up people by thousands in dense towns, with no outlets to the country but those which are guarded on both sides by dusty hedges. Now an open space near the town is one of Nature's churches; and it is an imperative duty to provide such things. Nor, indeed, should we stop at giving breathing places to crowded multitudes in great towns. To provide cheap locomotion, as a means of social improvement should be ever in the minds of legislators and other influential persons. Blunders in legislating about railways, and ab-

surd expenditure in making them, are a far greater public detriment than they may seem at first sight. Again, without interfering too much, or attempting to force a "Book of Sports" upon the people, who in that case would be resolutely dull and lugubrious, the benevolent employer of labor might exert himself in many ways to encourage healthful and instructive amusements amongst his men. He might give prizes for athletic excellence or skill; he might aid in establishing zoological gardens, or music meetings, or exhibitions of pictures, or mechanics' institutes. These are things in which some of the great employers of labor have already set him the ex-

MANUFACTORIES, &c.

Railroad Car and Engine Manufactory, — Main street, Cambridgeport. This is the oldest and largest establishment of the kind in the United States. During the past year, a Foundry for casting Car Wheels, &c., and a large building for the manufacture of Engines for Railroads, have been added to this immense establishment. About 250 hands are employed, and Steam power of about 150 horses. Here are made the best Cars which run on any railroads.

Brush Manufactory — Stratton, Sherriff & Co., South Third street. They employ nearly 150 persons. Office and store in Boston, 22 Exchange street.

New England Glass Company—For the manufacture of Flint Glass, North street, East Cambridge. This Company have extensive works, and employ over 200 persons; have 3 furnaces in blast, and use steam power 60 horses. Office in Boston, Battery March street, old Sun Tavern.

Soap Manufactories.—Under the head of Soap Manufacturers, the names of the various persons engaged in this business are placed. Large quantities of Soap are made in this city. The manufactory of E. A. & W. Winchester, on Water street, East Cambridge, is the most extensive establishment of the kind in the country. They have 12 soap pans, which contain 42,000 gallons; 6 steam boilers, power 85 horses. Connected with their manufactory, are Candle works, and a Box factory, giving employment to about 50 persons.

University Printing Establishment—Metcalf & Co., Holyoke near Harvard street: employ 50 persons; steam power 10 horses; 4 power presses running constantly during week days. Their arrangements for printing in the Greek, Hebrew and German languages, are unequalled by any other establishment in the Union. Stereotyping is also carried on by the same firm.

BOOK AND JOB PRINTING

NEATLY and PROMPTLY executed at the office of the Cambridge Chronicle. Having a good assortment of Type for JOB, FANCY and CARD Printing, and having excellent facilities for despatching the same, the subscriber solicits orders for all kinds of JOB PRINTING, which he will do at reasonable prices.

JOHN FORD.

HOPKINS CLASSICAL SCHOOL,

— ON —

DANA HILL.

The design of this School is, not only to prepare boys for the University, but also to fit them for any of the various departments of life. Untiring efforts are made to lead the pupils to the formation of those habits of diligence, cheerful submission to just authority, and proper regard for the rights and feelings of others, so essential to the character of a good citizen and an agreeable neighbor. No scholar will be retained after it has become evident that he is receiving no benefit himself, or is inflicting positive injury upon others. The most perfect frankness will at all times be used, in communicating to parents the faults as well as the virtues of their children, hoping thus to secure their co-operation in correcting the one, or in establishing the other. Grateful for the constantly increasing patronage bestowed upon the School for the last seven years, the subscriber assures all those parents, who continue to entrust their children to his charge, that no efforts will be spared, on his part, to render the School all that can be desired.

Quick Returns and Small Profits!!

FOR CASH ONLY!

MUNROE & EVANS

At the Old Stand,

On Main Street, Corner of Western Avenue,

CAMBRIDGEPORT,

Where they will be happy to supply those who may favor them with their patronage, with goods of the best quality, at prices which they are confident will give perfect satisfaction. From long experience of the credit system, we know that the course we intend to pursue, of trading only for CASH, is the only true policy, because, while it enables us to purchase our goods at the best advantage, it gives us the means of selling at a less price than is possible for those to do who continue to trade on the credit system. Every article sold is warranted to give satisfaction, and if in any case they should not, the customer will confer a favor by returning the same. Particular attention will always be had in the selection of the best TEAS. Goods sent to any part of the city free of expense.

WM. W. MUNROE. JOHN EVANS.

HOVEY & RYDER,

ARCHITECTS,

Snow's Building, Main Street,

NEAR THE POST OFFICE, WARD II.

They will design and execute Plans, and personally superintend the erection of buildings.

They are also agents for the sale of Moses Pond's and H. & F. Stimpson's *Cooking Ranges*, and several kinds of Furnaces, and they will superintend the setting up of the same.

WM. HOVEY, JR. CALVIN RYDER.

JOSEPH C. SMITH

Respectfully informs the public that he has located himself

OPPOSITE
THE
Hourly Office,

MAIN STREET, CAMBRIDGEPORT,

Where he intends to manufacture and keep for sale all the varieties of

GENTLEMEN'S HATS,

Made of the best materials, and combining all the recent improvements in the fabric, firmness of texture and fast color. Doing the work himself, and having had much experience in many of the most celebrated manufactories in the United States, he feels confident that he can furnish his customers with as good and cheap an article as can be purchased elsewhere.

He also keeps on hand a good assortment of Men's and Boys' Summer and Winter Caps, Children's Hats and Caps, Umbrellas, Canes, Buffalo Robes, Muffs and Victorines, Trunks, Valises, Suspenders, Boys' Comforters, Down Skins, &c. &c.

J. C. S. would tender his thanks for past favors, and solicit a continuance of the patronage of the citizens of Cambridge.

EDWIN RICHARDS,

PRODUCE and PROVISION DEALER,

Corner of Magazine Street and Western Avenue,

CAMBRIDGEPORT.

Having taken the above Market House, heretofore occupied by A. R. Coburn, he will keep a constant supply of all kinds of Meat, Vegatables, and other articles usually found in a Provision Store, which he will sell on the most reasonable terms, for CASH or approved thirty days' credit.

Purchases delivered free of expense to the customer, and the wagon will be sent every morning for orders to the dwellings of those who desire it.

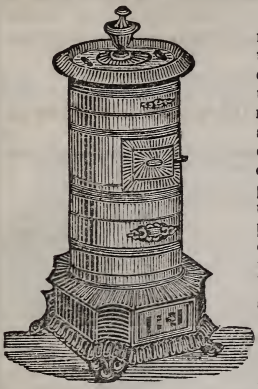
NEW IMPROVEMENTS.

The Air-Tight Madeira Parlor Stove,

PATENTED OCTOBER, 1845—IMPROVED, 1848.



By means of the improvements combined in this Stove, the flame and sulphurous gases are again brought into contact with the fire, by which many desirable advantages are secured. The heat is no longer violent, but so mild and equable as to cause the temperature of a Madeira climate to circulate throughout every part of the room; the degree desired being regulated with the precision of clock-work by means of the valve in the smoke-pipe, without the possibility of the escape of gas or noxious vapor—that being totally consumed with the smoke and dust arising from combustion, which are the grounds on which the patent is secured.

During damp or chilly mornings and evenings, a very small quantity of fuel used in this stove will be found to change the atmosphere throughout the room; while at the same time it is capable of producing, during the most severe cold weather, an agreeable summer atmosphere to the extent of the apartment, and it will be no easy matter to decide which part of the room is warmest, so equable is the heat. The fire is kindled with ease, requires but little tending, and if properly looked to will not go out from week to week. A moment's attention on going to bed insures a bright fire in the morning. From *one to one and a half* tons of coal is sufficient to keep it in operation during the winter season.

GREAT IMPROVEMENT
— IN —
DAGUERREOTYPING.

JOHN A. WHIPPLE,
96 WASHINGTON STREET,
BOSTON,

Has added to his extensive establishment a **Miniature Steam Engine,** for executing the mechanical parts — the first and only application of STEAM POWER to this Art.

This power gives a more perfect, exquisite and sensitive polish to his plates, especially large plates for Groups and Family Pictures; and enables him to make a GREAT IMPROVEMENT on pictures which have been pronounced very perfect.

He received one of the highest premiums for the art at the late Mechanics' Fair. The best judges say his Family and other Groups wholly excel any thing of the kind in the Daguerreotype Art. But he very much prefers to have his pictures speak for him, and therefore respectfully invites the public to call, examine and judge for themselves.

Among the Groups, Family and single specimens in his extensive Gallery, may be seen Rev. S. Bliss and Family, Hon. Wm. Jackson and Family of sixteen, Gov. Briggs and Council, seated as in their Chamber, and the four Hon. Judges of the Massachusetts Supreme Court as in their seat—with many other distinguished personages.

Likenesses of children taken best with clear sky. Adults in any weather. Prices reasonable. Perfect satisfaction warranted.

MAYNARD AND NOYES'

BLACK WRITING INK.

FOR SALE AT THE UNIVERSITY BOOKSTORE.

THIS Ink has stood the test of *thirty years' experience*, and during this time has been constantly increasing in public favor and patronage, and is now the leading article in the country. *It flows with freedom, becomes permanently black, does not mould under any circumstances*, and is adapted to any kind of pen.

Office of Merchants' Ins. Co., Boston, No. 18, 1848.

Messrs. Maynard & Noyes:—I have used your Writing Ink for the last sixteen years. In 1840, I gave you a certificate of its excellence, and having continued its use ever since, to my entire satisfaction, my opinion is confirmed in its superiority. *It flows freely from the pen, and is in all respects the best Ink I have ever used.* The other officers of the institution agree with me in the opinion here expressed.

GEORGE HOMER, SEC.

Boston, May 27, 1846.

For twenty years past I have had occasion to use Ink daily, and sometimes for the nicest of penmanship; occasionally, necessity or curiosity has led me to make use of the article made by different individuals,—*but I can cheerfully state that I have never found any that combined so many good qualities* as that made by Maynard & Noyes.

N. D. GOULD,
Teacher of Penmanship.

Registry of Deeds, Boston, Nov. 20, 1847.

Messrs. Maynard & Noyes:—I have made use of your Writing Ink for the recording of Deeds, &c., the past *twenty-five years*, and having found it to suit my wishes and purposes entirely, take pleasure in renewing my testimonial of its superiority. From the appearance of the Records in my Office, I am satisfied it is superior to any I have used, and consider it particularly adapted for all purposes, *where permanency of color is requisite or desirable. It flows well from the pen, and does not mould; and my oldest Records prove its color to be unalterably black.*

H. ALLINE,
Register of Deeds.

Post Office, Boston, Oct. 2, 1843.

The Black Writing Ink manufactured by Messrs. Maynard & Noyes, has been used in this Office for several years past. Other Inks have, during that time, been tested, but theirs has been in every instance preferred. *For fluidity, blackness, and permanency, the three important requisites, none has been found equal to it.*

HANKS' IMPROVED AIR HEATER,

FOR WARMING

Public and Private Buildings.

COMBINING more advantages than any article of the kind now in use. As the locomotive boiler is in economical and effective service, when compared with other boilers, so is this Improved Air Heater, when compared with other Heaters, now so generally used by the community at large.

1st. It will radiate more heat with a given quantity of fuel, than any other apparatus now in use for the same purpose.

2d. It is perfectly accessible at all times, and may be cleared of ashes and soot, either when in operation or not, by simply removing the rear plate of the Radiator.

3d. All the coal it may contain can always be seen by looking in at the 'feeding door;' thus it may at once be known if the *quantity* and *quality* of coal is as it should be.

4th It is so constructed that the required quantity of heat can always be had and controled, diminished or increased at pleasure, with a corresponding consumption of fuel.

New England Air-Tight Cooking Stove,

For Cooking with Coal or Wood.

THE best oven is that which will bake meat or bread, in the shortest possible time, without burning. Meat baked in this way, has all that sweetness of flavor so peculiar to meat roasted in a tin oven, and the bread retains all the freshness of the grain.

A slow, sluggish oven, parboils before browning, which accounts for that close, confined, sweaty taste of meat, so unpleasant to the epicure, when baked in a slow oven.—Bread baked in a slow oven is merely kiln dried, the crust browned and dried from a quarter to an inch into the body of the loaf.

This Stove has been called the Quick Oven, for the reason that it will bake in as short a time as may be required. It can also be made so slow as to bake the most delicate cake. *Bake quick or slow*, at pleasure, and all this can be done without burning the articles.

It is better than a brick oven, for the reason that it can be made to bake quick or slow, and it will bake in every respect as well. For sale at
